

# RELIABILITY. QUALITY. LEADING EDGE.

GET THE MOST OUT OF YOUR CURRENT PHONE SYSTEM, BOOST PRODUCTIVITY AND GAIN BUSINESS CONTINUITY WITH A RELIABLE SERVICE THAT KEEPS YOU AND YOUR CUSTOMERS CONNECTED.

Do you like your current phone system but desire more mobility?

---

Is customer communication critical to your business operations?

---

Ready to experience the benefits of next-generation IP capabilities?

SIP Trunking Service is more than your traditional T-1 PRI service. It allows you to use your current business phone system without requiring an upgrade or replacement.

With next-generation capabilities, you can experience the benefits of advanced features like simultaneous ring and unavailable call forwarding, all customizable through an easy-to-use web portal. In addition, SIP Trunking Service offers nomadic E911, an important feature supporting the safety and mobility of your employees.

Unlike other providers, Alaska Communications SIP Trunking Service is delivered over a dedicated connection, ensuring optimal voice quality and call completion reliability. Now small-to-medium businesses can achieve greater mobility and business continuity using enterprise-level phone features.

# DISCOVER THE BENEFITS

## Business Continuity

With SIP Trunking Service from Alaska Communications, you'll receive highly-redundant service supported by two geo-diverse switches that offers built-in business continuity capabilities such as unavailable call forwarding.

## Cost Savings

You can save up to 50% on your local and long-distance bill with minimal or no upfront investment. SIP Trunking offers free inter-office calling across multiple sites within your company.

## Quality

Unlike other providers, our service is delivered over a dedicated Ethernet connection. Meaning you'll enjoy best-in-class voice quality with clear, consistent communication.

## Nomadic E911

Maintain the safety of your employees with nomadic E911. Accessible through our easy-to-use web portal, nomadic E911 allows you to enjoy the mobile capabilities of your VoIP phone system while ensuring E911 information is kept up-to-date.

# EXPLORE YOUR NEXT-GENERATION IP FEATURES

## Delayed Call Forwarding

Automatically forward incoming calls to a different phone number if the call is not answered within a specified length of time or number of rings.

## CUSTOMER FAVORITE FEATURE

## Unavailable Call Forwarding

In the event that your connection fails, incoming calls will be forwarded to a designated phone number.

## CUSTOMER FAVORITE FEATURE

## Simultaneous Ring

Have multiple phones ring simultaneously when calls are received on your phone number.

## Selective Call Rejection

Reject incoming calls from any number you place on the rejection list.

## Anonymous Call Rejection

Automatically reject all incoming calls from callers who have blocked their Caller ID information.

## Webportal Administrator

Easy-to-use web interface for administrators. Update E911 by adding current address, even when traveling.

# SELECT YOUR BANDWIDTH

SIP Trunking Service bundles long-distance minutes and is delivered at a lower cost than a traditional T-1 PRI service. It includes concurrent calls or channels, business features, in-state and out-of-state long-distance minutes and up to 100 local phone numbers.

SIP Trunking Service Bandwidth	1Mbps	2Mbps	3Mbps
Concurrent Calls (CC)	10	20	30
In-State/Out-of-State Long-Distance Minutes (every month)	800	1600	2400
Monthly Charge	\$160 (5-Year Term) \$170 (3-Year Term)	\$320 (5-Year Term) \$340 (3-Year Term)	\$460 (5-Year Term) \$500 (3-Year Term)

Contact a Client Account Manager for pricing greater than 3Mbps and for details about the long-distance-per-minute bundle rate.
