

TRUSTED. SCALABLE. HYBRID.

]THIS IS THE CLOUD ON YOUR TERMS.

DO MORE, SPEND LESS WITH MICROSOFT AZURE

Microsoft Azure is a comprehensive platform of integrated cloud services such as computing, storage and backup solutions suitable for businesses of all sizes. Focused on helping you grow with greater efficiency and flexibility, Azure makes it possible for you to integrate your public cloud applications with your existing IT environment. With Azure, you can be up and running fast, scale up or down as needed, and avoid high capital costs — paying only for what you use. As a Microsoft Gold Partner, Alaska Communications can help you transform your business into the future with Azure cloud services.

EXTENDING YOUR I.T. INFRASTRUCTURE

For many businesses, it isn't practical if the cloud is an all-or-none proposition. With Azure, you have the flexibility to run some applications on-premises, while moving others to the cloud. Whether you are testing the cloud for the first time, or going all-in, Alaska Communications experts can help make the transition seamless.

CHOOSE THE COMBINATION THAT'S RIGHT FOR YOUR BUSINESS

Physical Server

Virtualization

Cloud

DISCOVER THE BENEFITS

FLEXIBILITY

Microsoft Azure offers a unique level of flexibility on how and where to host your applications, whether on servers or in the cloud.

SCALABILITY

Have everything you need to support your business ready to go when you need it. You don't have to worry about running out of capacity for things like file storage or scaling up your applications to support more employees or customers.

MOBILE ACCESS

Once applications are hosted in the cloud, it is easy to enable remote and mobile access for your employees, so the right people can get to the applications they need.

REDUCED COST

You can host apps on Microsoft Azure's fully-managed cloud infrastructure. This offers the benefits of fast deployment and no expensive server hardware. With Azure, you pay only for resources you use.

PEACE OF MIND

When it comes to business continuity and protecting your data, you can have the peace of mind with Azure's 99.95% uptime Service Level Agreement.

ENTERPRISE-LEVEL SECURITY

The cloud offers businesses of all sizes with enterprise-level security. With Azure, you will have the highest level of data protection and data center security required by the largest organizations.

EXPLORE CLOUD SERVICES AND START THE TRANSFORMATION

DATA BACKUP

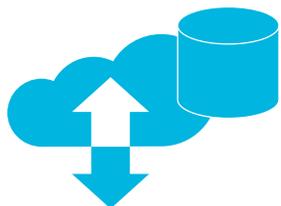

With Microsoft Azure Backup, you have a simple, reliable, cost-effective option for backing up your data to the cloud. Microsoft Azure Backup encrypts and protects your backups off-site, adding a layer of protection in case data loss or disaster impacts your servers.

DISASTER RECOVERY

Disaster recovery keeps operations running during an outage or a natural disaster. Build and automate your disaster recovery plan with Microsoft Azure Site Recovery. Orchestrate replication of on-premise virtual machines and physical servers to the cloud.

VIRTUAL MACHINES

Move your website and applications to the cloud and make it easy to provide a reliable, satisfying and secure customer experience without the need to invest in costly infrastructure. Azure Virtual Machines gives you the flexibility of virtualization for a wide range of computing solutions—development and testing, running applications, and extending your data center.

CONNECTING TO THE CLOUD

Ready to make the move to the cloud? Make your connection to the cloud fast and reliable with Internet from Alaska Communications. Choose between Business Internet, Business Internet Plus and Dedicated Internet Access.

Need more than a connection? Transfer and access critical, time sensitive data to the cloud with Microsoft ExpressRoute - a private connection between your business and data center.
