TOP REASONS YOUR BUSINESS NEEDS ETHERNET

Business Ethernet, powered by the Alaska Communications IntelliCloud Network, is the most advanced data network for businesses in Alaska. With high-speed, high-quality, customizable services, we'll keep you connected so you can focus on your business.

A HIGH-PERFORMANCE NETWORK FOR HIGH PERFORMING BUSINESSES

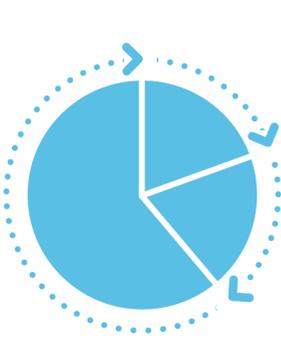

The IntelliCloud Network is the Alaska Communications advanced data network. It's the easy-to-use local network you can trust and rely on. With Ethernet services on the IntelliCloud, we make sure your network runs smoothly with reliable access to cloud applications.

1 COMMITTED TO NETWORK RELIABILITY

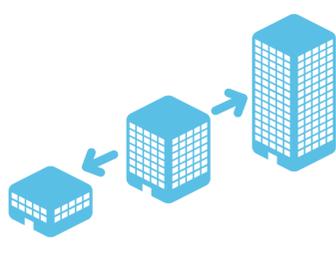

Our IntelliCloud Network offers the best-in-Alaska service commitment to assure your network is, and stays, running at peak performance. Our Quality of Service standard means you'll have a predictable, high-performance network.

2 CUSTOMIZED TO FIT YOUR BUSINESS

Tailor Business Ethernet service to meet your business needs and prioritize critical IP traffic over less-critical traffic for the most efficient data delivery. As your business priorities change, we can easily adjust your services to change with you.

3 SERVICE THAT GROWS WITH YOUR BUSINESS

Whatever the size of your business, Business Ethernet scales bandwidth up and down based on your needs. As your business grows and changes, your network capabilities grow with you.

4 BUILT TO THE HIGHEST GLOBAL STANDARD

Our Business Ethernet performs at the industry's highest standards. The proof: we're the only Metro Ethernet Forum 2.0 certified Ethernet carrier in Alaska, and one of the first 3 in the world. Our network exceeds global standards—and so do our network professionals. They're certified at the highest level to take care of you and your network.

5 RECOVER BEFORE DISASTER STRIKES

The IntelliCloud Network moves data traffic over the most geographically diverse connection between Alaska and the rest of the world. Our Business Ethernet gives you multiple connectivity paths, so even if one path is blocked or interrupted, data still flows, keeping your business connected.

6 REDUCED COSTS = MORE MONEY IN YOUR POCKET

With Alaska Communications Business Ethernet, you'll experience fewer problems, faster fixes, and lower costs. We built our services to the highest standard, so you won't need expensive hardware upgrades or costly specialized training.

7 SIMPLE, CONTROLLED USE

Your job can get complicated. With Business Ethernet from Alaska Communications, you have the control to quickly adjust your data network to your specific needs while we back the performance with true end-to-end service level agreements.

8 SECURE INFORMATION STAYS SECURE

Network security is vital to your business. That's why our Business Ethernet service gives you the ultimate in security features to keep your network secure and you in control.

9 CLASS OF SERVICE OPTIONS

From the mission-critical to basic tasks, we'll keep your applications running smoothly. With our Gold Level of service, our commitment is to keep your network going, with no more than 2 minutes of interruptions in a month.
