RE: Network Change Notification (NCN2014-01)

ACS of Anchorage, LLC provides this Short Term Public Notice under Rule 51.333(a).

This network change has been scheduled for May 21, 2014 through approximately June 6, 2014.

Location(s)

ACS of Anchorage, 1720 Tidewater Road and at 401 East Bluff Road on

Government Hill, Anchorage, Alaska.

Type of Change

This project will replace an old existing copper fed Digital Loop Carrier (DLC) with a new fiber fed DLC and cross connect at 1720 Tidewater Road and at 401 East Bluff Road on Government Hill to provide high speed services to the Port of Anchorage.

Scope of Work

Alaska Communications proposes the installation of a new DLC to provide additional communication services to the Port of Anchorage area of Anchorage, Alaska. Presently, Alaska Communications is unable to provide DSL and HDSL services to this area without extensive copper and repeater build outs. This new DLC will provide essential non-loaded, non-bridged, POTS, DSL, and HDSL services to the area. By this incorporation, the longest loop will be approximately in the 2,000'-5,000' range, which allows Alaska Communications to provide high speed services. Presently, the longest loop for this area is outside the 12,000'-18,000' range.

Impact

Presently, there are approximately 402 subscriber lines that will be affected by this project. Upon completion, this project will provide essential non-loaded POTS, DSL, and HDSL services to the service area

Downtime

This project will result in downtime of approximately 5 minutes per subscriber.

Attachments

Please see attached map of the area affected by this change.

Cut Date

Transfer work to begin at or near May 21, 2014 and continue through

approximately June 6, 2014.

Carrier

April 21, 2014 – approximately 402 subscribers (34 GCI customers)
