RE: Network Change Notification

Carrier: ACS of Anchorage, LLC d/b/a Alaska Communications, 600 Telephone Ave., Anchorage, Alaska 99503

Implementation Date:

This network change has been scheduled for December 1, 2016.

Description of the Planned Network Change:

Alaska Communications will be installing a new fiber fed Digital Loop Carrier (DLC) at 1811 E 68th Avenue and retiring the existing buried copper physical feed currently in conflict with the Alaska Department of Transportation road construction along the New Seward Highway. The cutover of all services to this new DLCs will eliminate the need for the buried copper in conflict with road construction. The new DLC will provide essential non-loaded POTS, DSL, and HDSL services into these areas.

Description of reasonably foreseeable impact(s) of the planned change(s):

The retirement of the copper feeder will shorten the existing copper loops in the affected areas from over 5,000 feet currently to less than 4,500 feet. The change will require a change in provisioning from unbundled network element ("UNE") loop rate to a wholesale rate pursuant to the Global Interconnection and Resale Agreement between GCI and the ACS Local Exchange Companies.

The Planned Network Change will occur at the following location:

1811 E 68th Avenue, Anchorage, Alaska 99507
